REMINDERS ABOUT THE RULES

- II. 4 COMMON LAUNCH AREA(S) (9.1.1)**
CLA1 – Szeged Airport.
- II. 5 COMMON LAUNCH POINT(S) (9.1.2)**
CLP1 – 3032 / 2236, 251 ft
- II.10 RECALL PROCEDURE (10.15)**
This will be defined when/if necessary at the task briefing. An SMS system will be used, and a reminder given at the task briefing if likely to be used.
- II.12 GOALS SELECTED BY A COMPETITOR (12.2)**
Director will caution competitors about height of goal setting over water.
- II.13 & 5.10** The Official Notice Board is on the window of the debriefing room.
- II.17.c GPS Handling:** If you have any problem with loggers then immediately call the Chief Scorer: **Martin +43 699 10151839**
The loggers and FRF must be brought back to the Competition Centre immediately after the flight. **No** refuelling before debriefing.
- II.22 2D/3D SCORING METHODS**
The separation altitude will be 600ft MSL
- II.24 MAP CO-ORDINATES** In the FIA logger this will always be in the 4-4 format.
- II. 17(b) & III 6.13** Competitors are reminded to set up personal loggers in accordance with these rules

- III 7.9 DEGREE REFERENCE** Unless otherwise stated, directions are expressed in degrees referenced to the grid system printed on the competition map.
- Pieball information will be magnetic.
- III.9.14 Note:** No use of launch masters and launch assignment during the Event. The competitor may ask for an assistant at the flagpole.
- III.12.5 Note:** The target will always be displayed within 100 m of the given goal coordinates, the closest as possible to the coordinates. If the target is not displayed then the goal will be on the ground.
- III.12.11.2 Note for all tasks:** physical or electronic mark is mandatory.
- III.12.18.1** The scoring areas will be track files. The boundary will be the track line. The track files (plt) will be downloadable from the ENB. The printed version of the track files will be published on the task sheet. Any competitor who is unable to download the track files may ask for a copy on his USB stick or he can ask for the printed version of the track points list.
- III.12.20.1** *Note: The MMA is radius of 50 m by default, and exceptions will be noted on the task sheet. If the MMA is more than the natural borders of the area, then the MMA will be the area defined by the natural borders. The measuring team will not measure, nor search for, nor collect markers dropped beyond the MMA or in an inappropriate area like cornfields, crops, bushes, trees or lake, etc .If there is a description or proximity statement in the waypoints file then it is for information only.*
